

# Having it all: Is maintaining North Sea Hydrocarbon Production to protect Security of Supply really possible in a Net Zero World?

Donna Sutherland

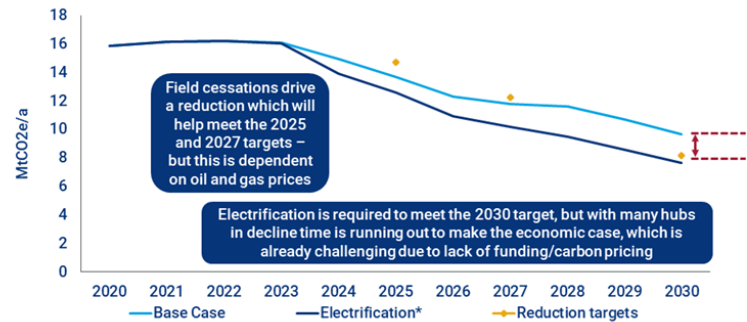

24 May 2022

# Can we protect security of supply in a Net Zero world?

## The UK North Sea Transition Deal supply decarbonisation target is achievable - but challenging

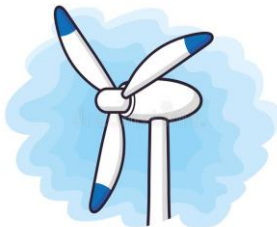

UK upstream absolute emissions

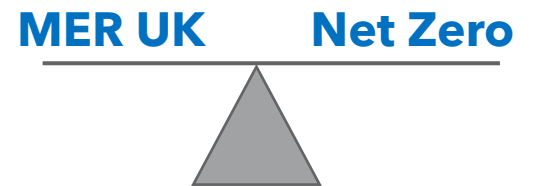

Source: Wood Mackenzie Emissions Benchmarking Tool. \*Assumes 100% electrification at all pre-FID West of Shetland projects and 100% electrification of key Central North Sea hubs.

## Solutions to meet targets come with challenges...

## Delivering Success...

Thank you
